

# What people are saying...

“Through Google Cloud training you gain an overview of the platform, the tools that are available, and the options that you have. It makes it easier to avoid wrong turns and to see the possibilities. Also, the reference architectures and decision diagrams in the training materials allow you to choose the right approach for a specific problem.”

**Michael Gfeller,**  
Solution Architect, Computas

“When I decided to get certified, my networking knowledge was a bit rusty since I’ve been using App Engine and it does a lot of the work for you. With Kubernetes and IaaS gaining more traction, those networking concepts have become important again. Google Cloud training and certification made sure my skills were current and that I was using Google Cloud best practices”

**Niels Buekers,**  
Managing Director, Fourcast

“Google Cloud certification goes hand in hand with experience. You can’t just “cram” to prepare for a Google Cloud certification exam; you really need to rely on your cloud applications experience as well as your knowledge of Google Cloud technologies.”

**Welby McRoberts,**  
Customer Reliability Engineer for  
Managed GCP, Rackspace Ltd

“Growing and retaining talent is woven into everything we do. Google Cloud training and certification has been key to our strategy of developing talent internally. The program has been instrumental in supporting our rapid growth.”

**Simon Lewis,**  
Head of Engineering Delivery, Appsbroker

# Build skills for the future with Google Cloud Learning

Google Cloud

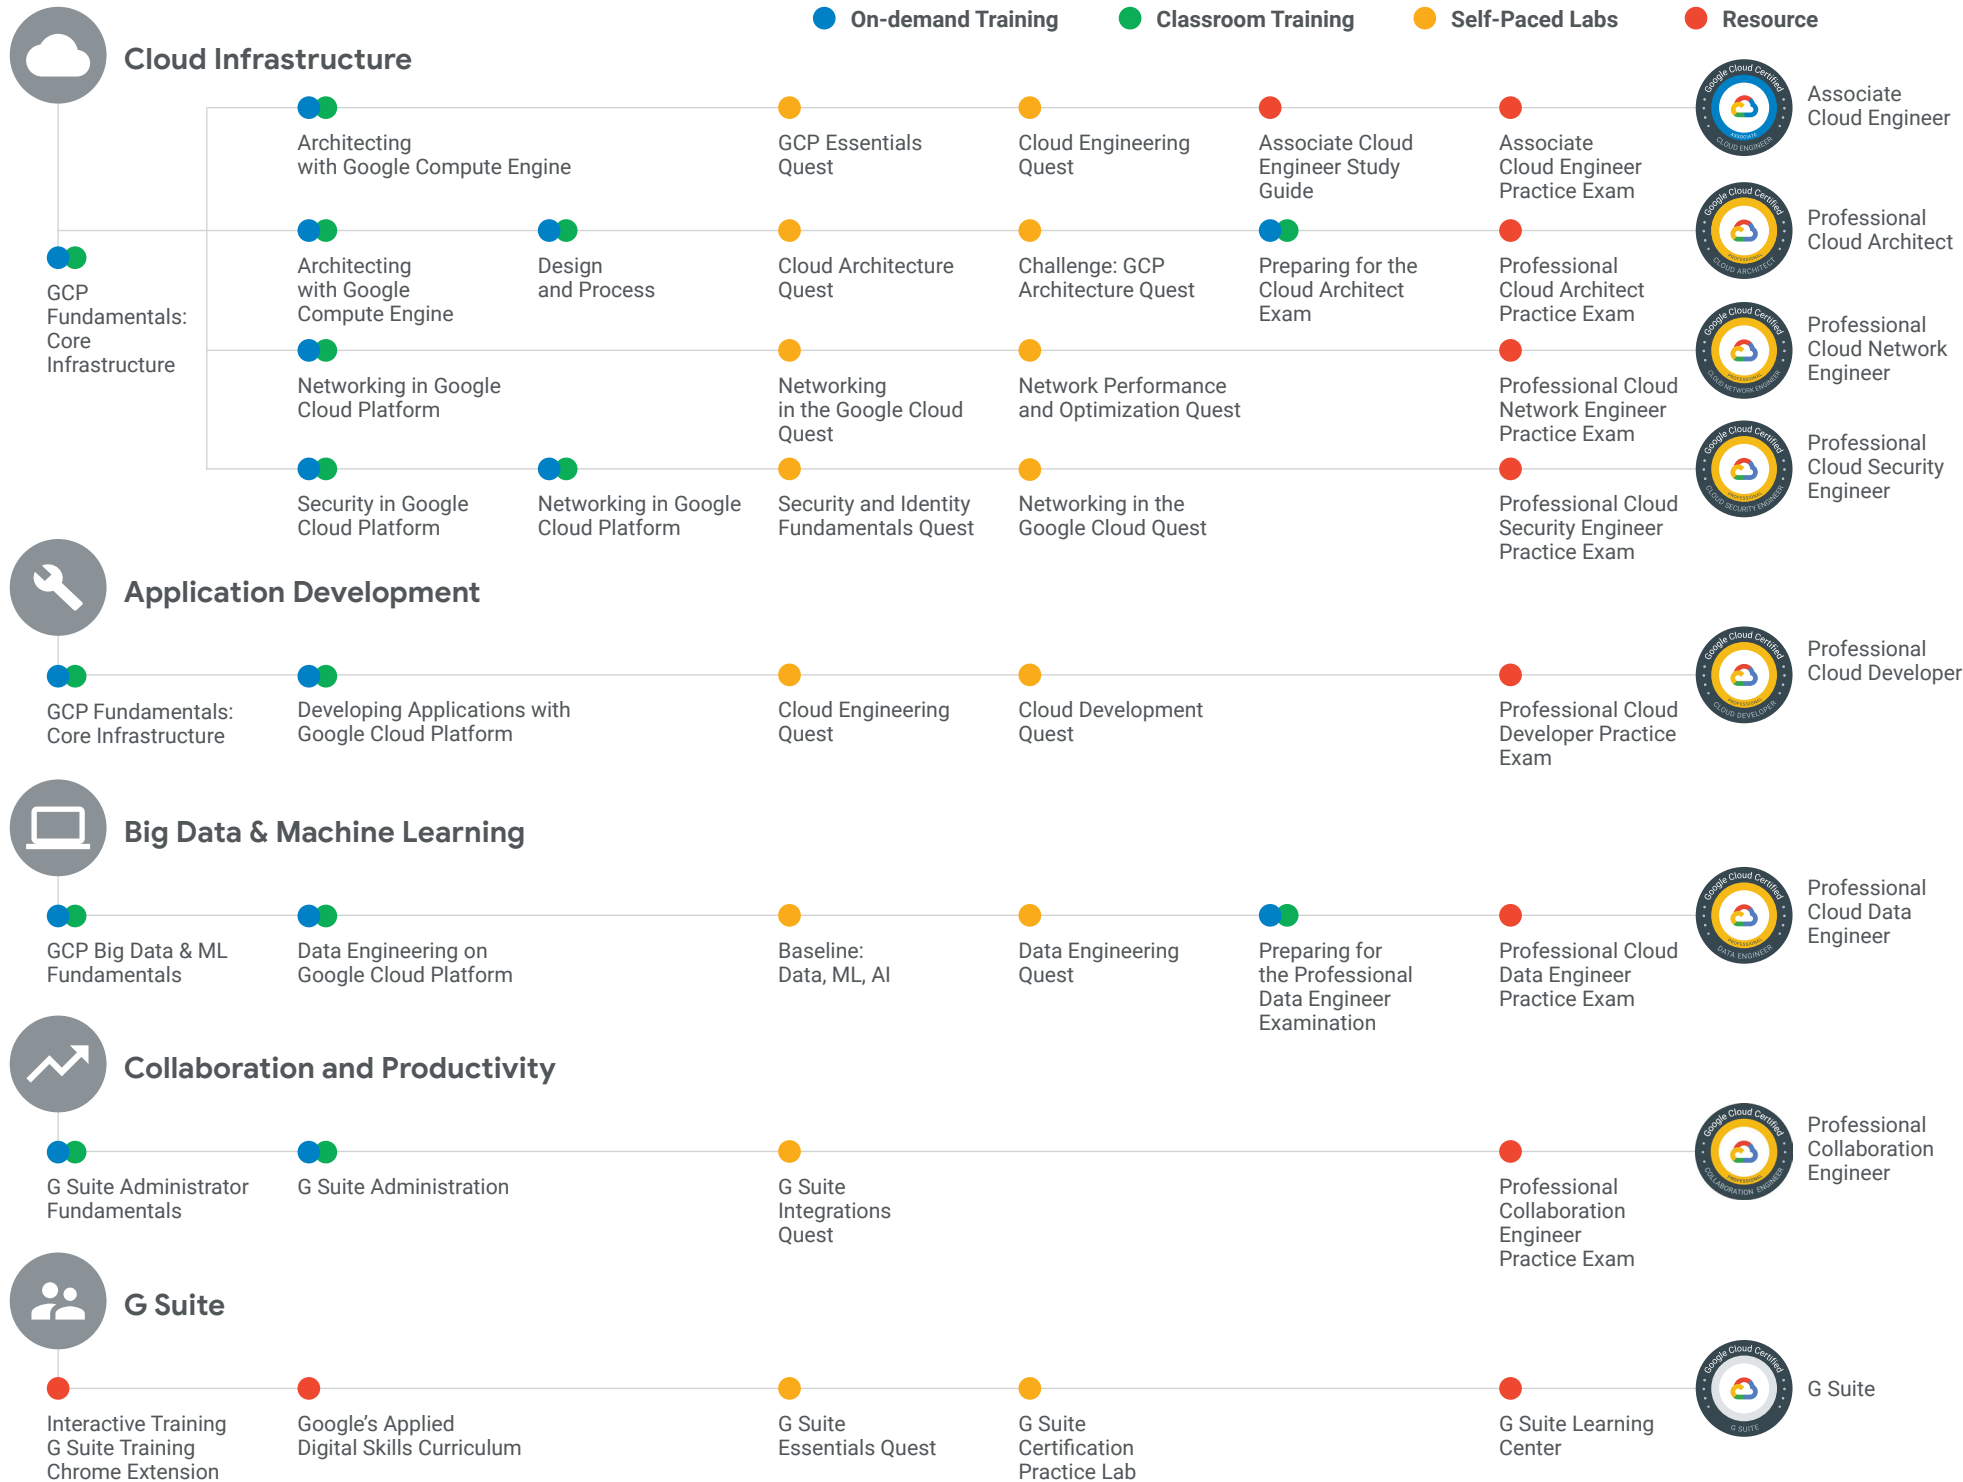

Whether you’re starting your cloud journey or building upon years of experience, our learning portfolio contains updated and relevant training to help develop skills you’ll need to manage, build, deploy and implement the latest Google Cloud technologies at scale. Our Google Cloud Certified program provides benchmarks that make it easier to identify cloud professionals with the requisite skills to leverage Google Cloud Platform.

## Learn anytime, anywhere

- [cloud.google.com/training](https://cloud.google.com/training)
- 8+ on-demand role-based learning paths
- 40+ individual on-demand courses
- 300+ hands-on labs
- 30+ lab quests
- Available in up to 6 languages

## Benefits of Google Cloud Certification

- Google Cloud Certified Directory
- Be a part of a global community
- Digital badge and certificate
- Google Cloud Certified swag
- Special access at Google Cloud events
