Pro Tips

- Google Cloud Partners get access to [Coursera On-demand Training](#) & [Owiklabs](#) credits free of charge
- Professional Certifications count toward both Sell and Service partner types

Learning track (path)

Track composed of multiple courses, either by technology or role with easy visibility to learning progression. May or may not lead to a credential or certification. May or may not need formal assessment. Min / required courses + optional ones will all form part of the learning path.

Credential

Google Cloud recognition of completion of a learning track available to **partners only** as part of the partner program. Credentials are held at individual user level and aggregated to partner organization level. When a user moves to a different partner organization, the credential travels with the user.

Certification

Industry recognition of technical proficiency awarded by Google Cloud that an individual has gained proficiency in a particular topic or area of expertise.
